

CANSBEHAV

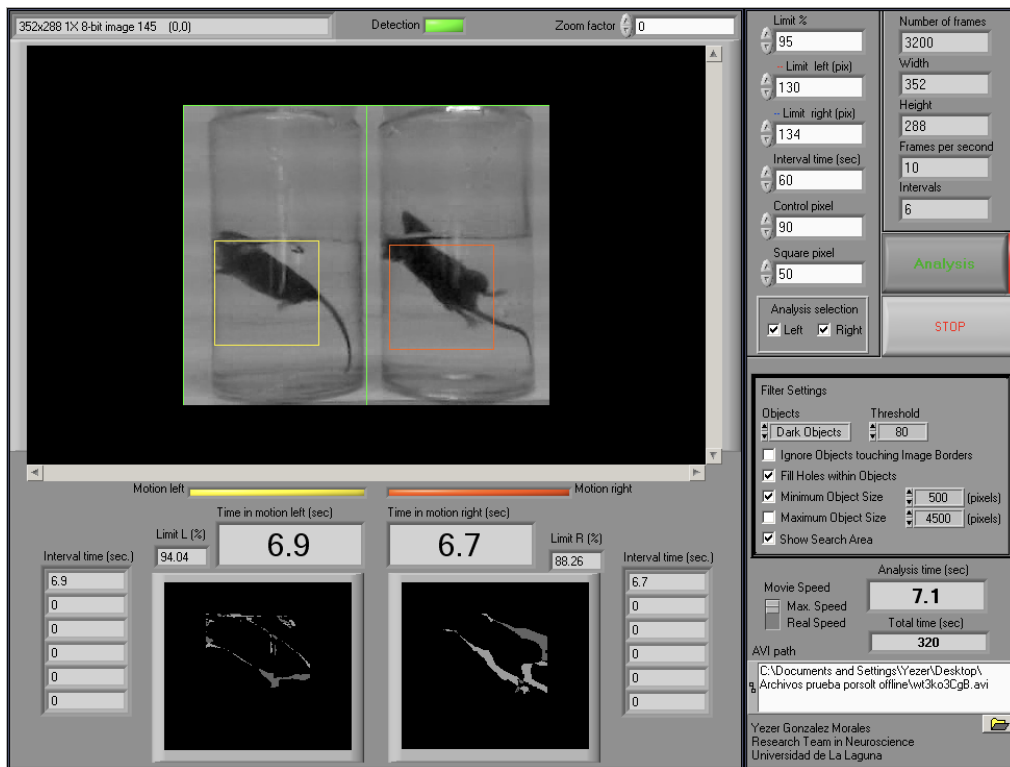

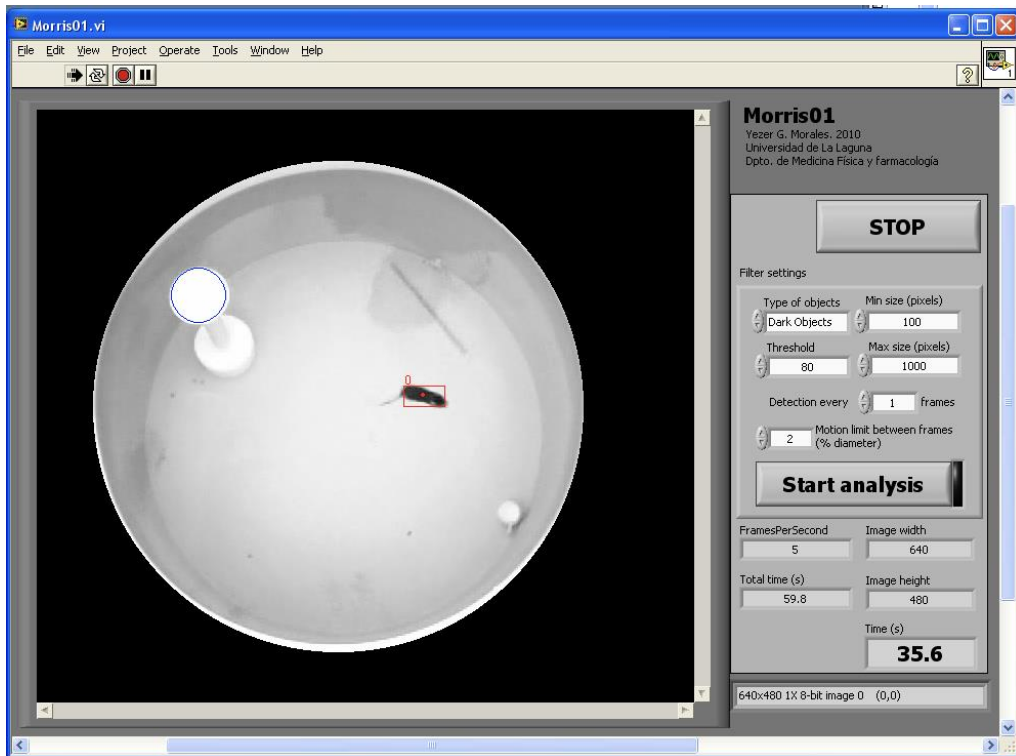

Free-shareware software (routines for LabView®, National Instruments) for image-based analyses of four behavioural tests

We created these programs for the analyses of behaviour in rodents (mice and rats) which work using image analysis.

These programs include:

- Open field,
- Elevated plus maze,
- Morris' Water Maze,
- Porsolt's test.

- These programs were used in two papers from our research group:
- CASTAÑEYRA-RUIZ et al. (2020) *Cell Tiss. Res.* **380**, 59-66
 - PEREDA et al. (2015) *Behav. Brain Res.* **278**, 98-106.
- And in two PhD Theses:
- Yézer González Morales (2010)
 - Daniel Pereda de Pablo (2013)
